MarketingInfo:

Classic Cross-Hatch Design: MSI\'s concise and refined classic cross-hatch design uses high-tech color film print technology for a dazzling look. The sparkling; scratch-resistant enamel provides a high degree of rigidity. Under different light sources; this finish will emit a multitude of color variations that create sparkling visual effects and evoke a minimalist undertone of taste and style. Easy-to-Carry Thin and Light Design: Abandoning the stereotype of thick-and-heavy traditional notebook; MSI new C Series offers thinner and lighter solution for more convenient usage. Furthermore; it is easier for you to take it on the move. 16:9 Theatrical Aspect Ratios: Comparing the 16:10 screens of the regular notebook computers to the 16:9 golden theatrical ratio of the MSI Notebook; the visual span has been extended by 14%. The black bars on the top and bottom of the screen can be avoided; very suitable for playing High Definition movies so you may watch it from any angle and truly enjoy the advanced imagery. High Resolution Webcam and MIC: Built-in high-resolution webcam and MIC allow you to communicate with ease! Ready for image recording means you can share your video experiences without missing a beat! WLAN for Roaming Wireless Access Anywhere: Wireless LAN makes you to access the internet wirelessly at any time.""
